

CIRM Research Leadership Awards

RFA 09-04: CIRM Research Leadership Awards

The CIRM Research Leadership Awards will support robust and innovative stem cell research programs of the most promising researchers newly recruited to California. These awards will enable universities and research institutions to attract the very best stem cell scientists, with a focus on those who are early-to-mid career but have already established themselves as independent investigators and emerging national or international leaders in the stem cell field. They also will permit the recipients to pursue high-risk, high payoff, innovative studies that could not be adequately supported by other sources. The awardees will bolster California's efforts in stem cell research and further CIRM's mission to advance novel treatments and cures into medical practice.
